Monthly Observing Nights We have a dark sky observing site located on a hilltop near Mounds, OK. Our site features an acre lawn and the ACT Observatory and classroom. The observatory houses a 14 inch RCX 400 telescope plus our members set up several more telescopes on the lawn for sharing views.

As a member you will be able to share in our observing activities at the observatory and enjoy a panoramic view of the sky and countryside. Monthly Observing opportunities include:

ACT MEMBERS OBSERVING NIGHTS are held near the new moon for club members to work on observing projects or share ideas with others. These are open to our members and their families may come with them.

GUEST OBSERVING NIGHT An evening where we non-member guests to visit the observatory. Our members will set several up telescopes to share the wonders of the night sky.

DUE TO COVID these events are on a RSVP basis for now which can be done on our website
Donations are requested for Non-member guests - suggested amount \$ 3 per person.

No large groups please - these would require separate arrangements.

All events are subject to Weather cancellations.

Monthly Club Meeting nights at Jenks High School planetarium - During the School year months we host meeting nights with guest speakers or other presentations on a variety of topics related to observing and astronomy.

Club Newsletter, *The Observer* Our newsletter includes a preview of our meeting topics, information about upcoming meetings and club events. The *Observer* also contains articles on astronomy topics, events, and interesting observation opportunities.

E-mail updates on Breaking Astronomy News Several of our club members keep us updated on fast breaking astronomy events such as new comets, upcoming eclipses and other astronomy news.

Members Facebook forum – Members can join our Members Only Facebook to exchange ideas – plan spontaneous observing.

Full Membership includes membership in the Astronomical League and the Night Sky Network

The **Astronomical League** is a national organization of amateur astronomers. The Astronomical League has developed many observing certificate programs to help you develop observing skills to better enjoy the many wonders of the night sky. The Astronomical League's website can be found at <https://www.astroleague.org/>

The **Night Sky Network** is sponsored by NASA and JPL. It has many resources to help astronomy clubs promote astronomy. The Night Sky Network's website can be found at <https://nightsky.jpl.nasa.gov/>
