

Support

This app has been developed with as-is functionality at time of development. If you have issues with its use please email the developer at kg5vw.ok@gmail.com

TIPS

If you are having difficulty locating your saved files, re-trace your path during the End Session to go to the location that you chose to send the file to (email, txt, save to file, etc...). The file should be found in that location chosen. If you chose to save to files it should put it either on your device files or possibly your icloud files. Browse to the selected location and the file should be stored there.
